

Ocimf Mooring Equipment Guidelines 4th Edition

Ocimf Mooring Equipment Guidelines 4th Edition - When connecting synthetic tails to HMSF and wire mooring lines, the elasticity of the tails introduces energy that can significantly increase the snap-back hazard. Elongation is proportional to the length of the tail. The fitting of longer synthetic tails, e.g. 22m tails from 11m tails, proportionally. Mooring Equipment Guidelines The Mooring Equipment Guidelines is an industry publication for the safe mooring of tankers and gas carriers at terminals. These guidelines provide an extensive guidance for safe mooring for ships and terminals. The fourth edition of OCIMF Mooring Equipment Guidelines was issued in July and scope of the current article is to provide a quick update on to what is being introduced. This fourth edition of Effective Mooring is aligned with the guidance in OCIMF's Mooring Equipment Guidelines, Fourth Edition (MEG4), which contains more detailed technical information on the design and maintenance of mooring systems. New in Effective Mooring, Fourth Edition: Emphasis on the whole mooring crew being responsible for safety.
